IPX4

V = Volume

A The electrical installation must be protected by means of a IDn 0,03A and 25A differential switch and a magnetothermal switch of 20A. Both switches must be placed outside the bathroom.

B The power connection of this product must be permanently connected to a fixed electricity line. Placement of a plug is not acceptable.

C The electrical line to be installed must be a hose consisting on three drivers (phase, neutral, earth) of at least 1mm² of section exclusively dedicated to the WC. In the event that, due to failure, it is necessary to handle or replace the power cable, this must only be done by Technical Service staff.

D The power connection must only be done inside the included IPX4 electrical box. In case of making a junction of the electrical line must be also used a box of this type.

E The range of function of the WC is 100-240V, 50/60Hz.

Neither component nor connection of the WC must be operated.

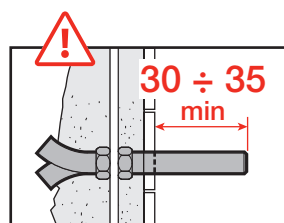

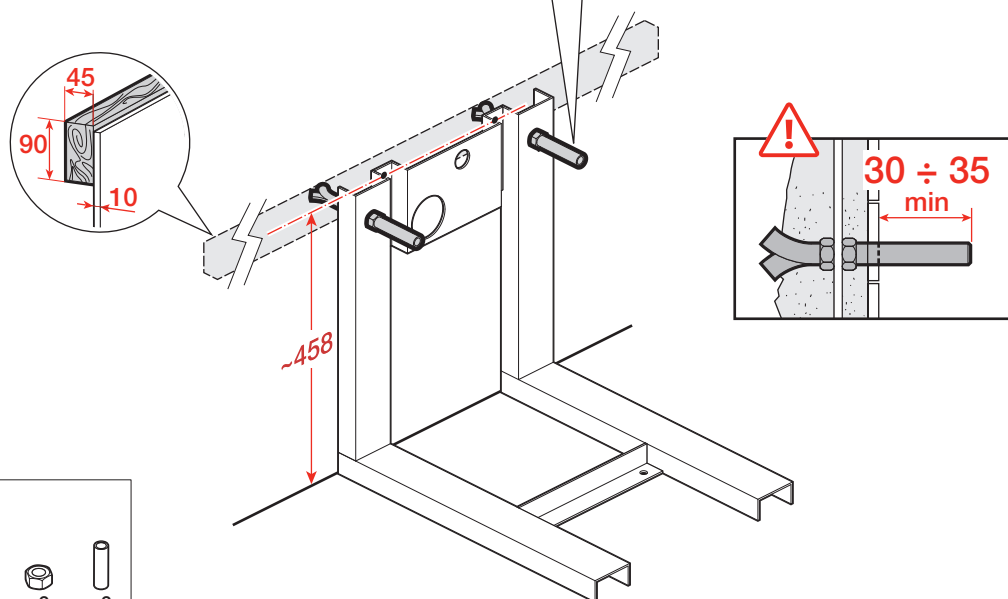

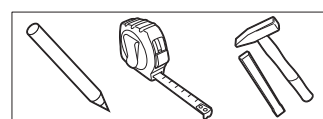

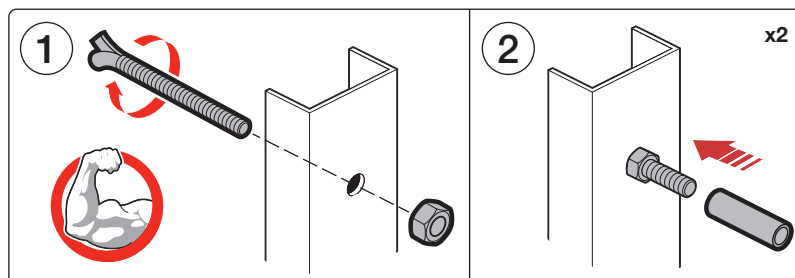

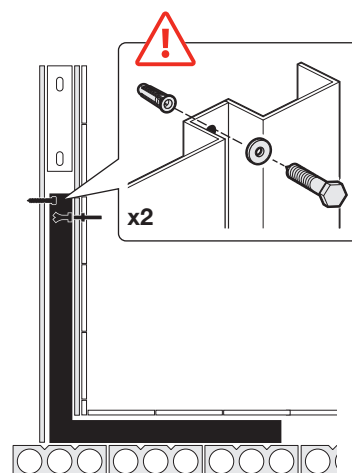

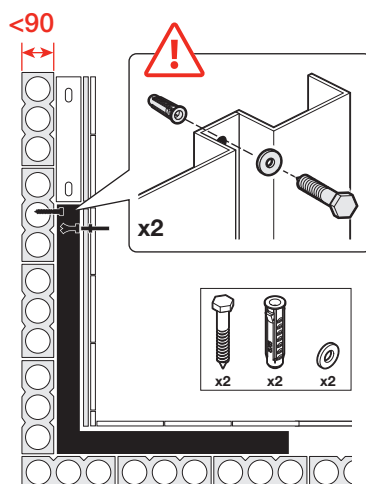

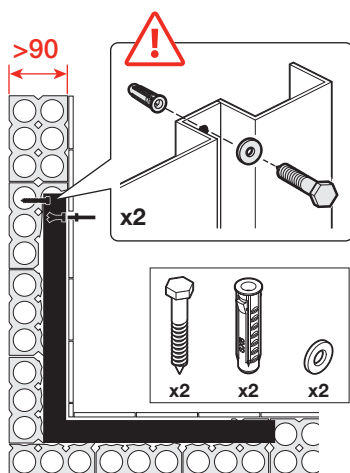

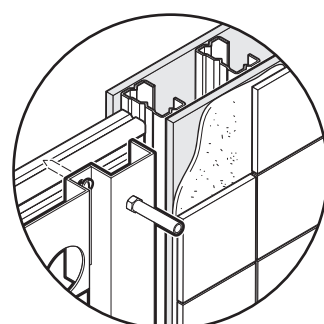

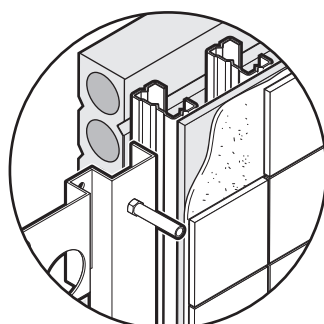

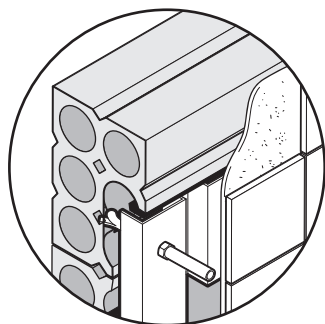

No electrical device must be introduced inside the WC.

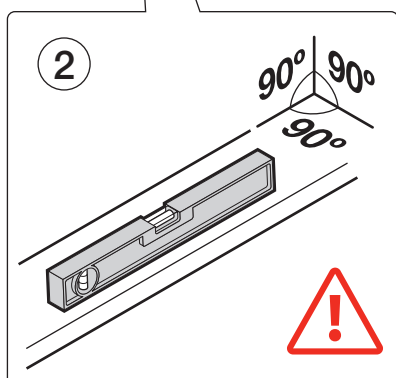

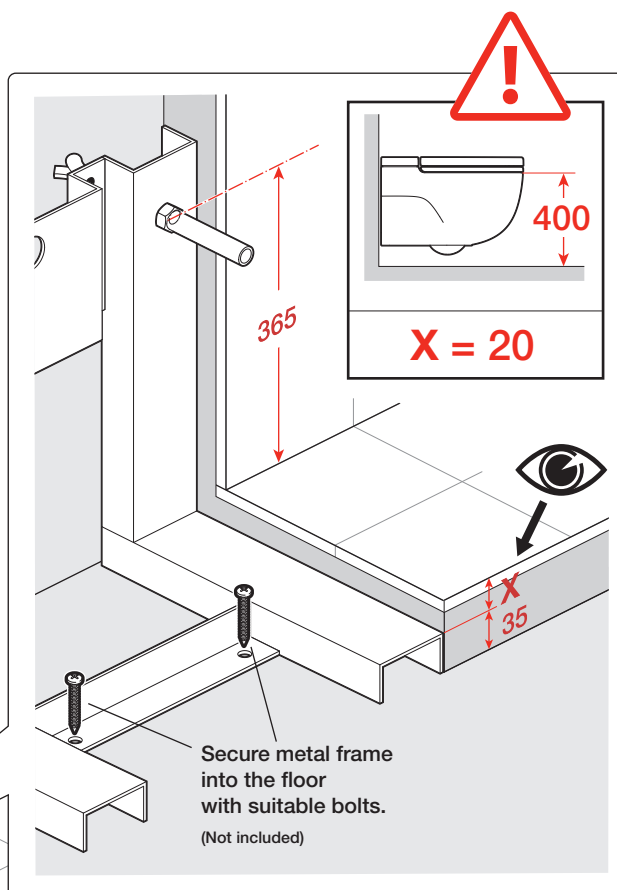

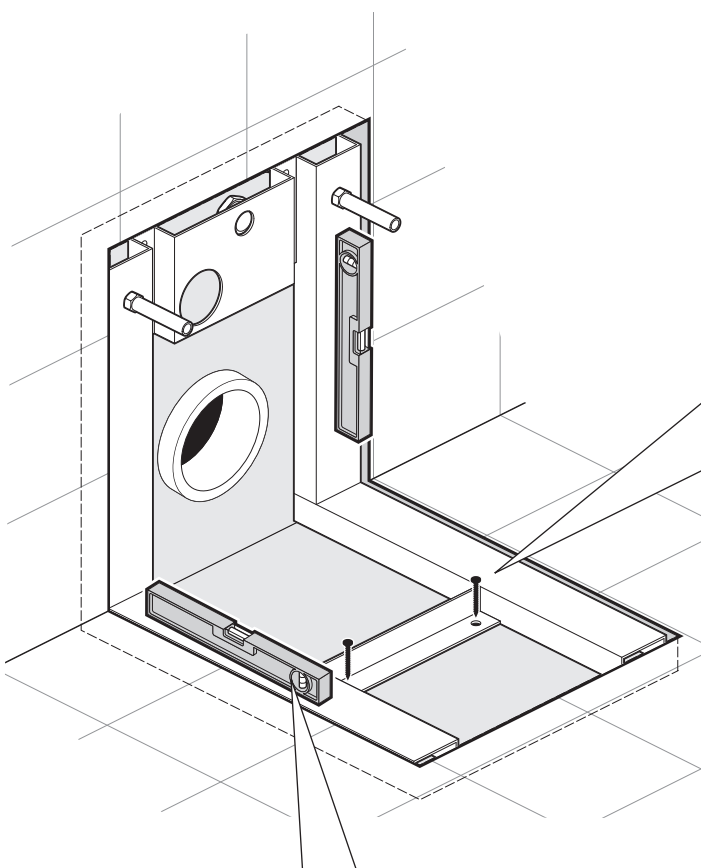

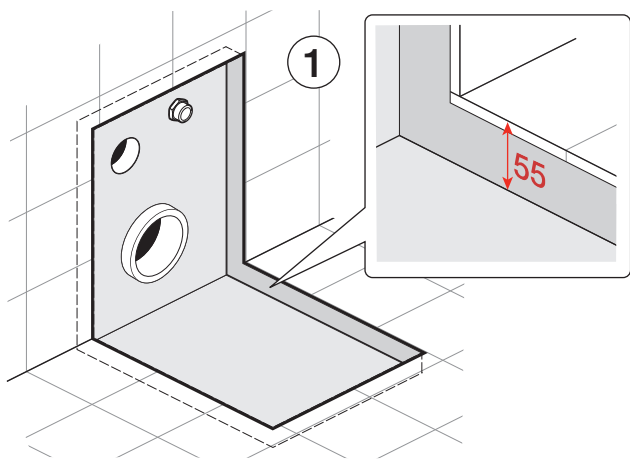

This product must be installed by qualified personnel, in according with the national current regulation.

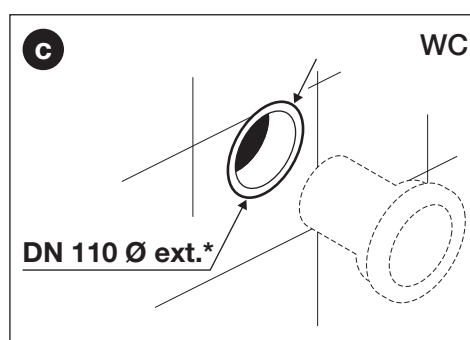

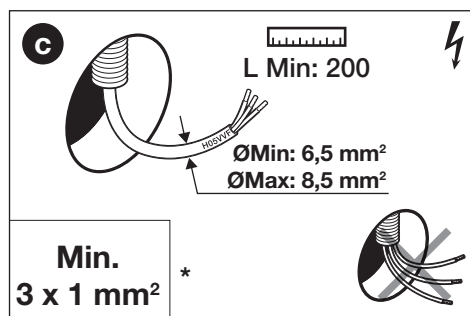

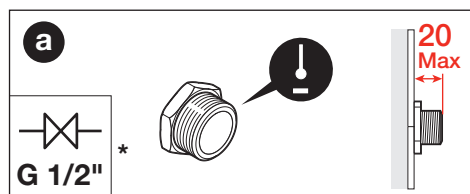

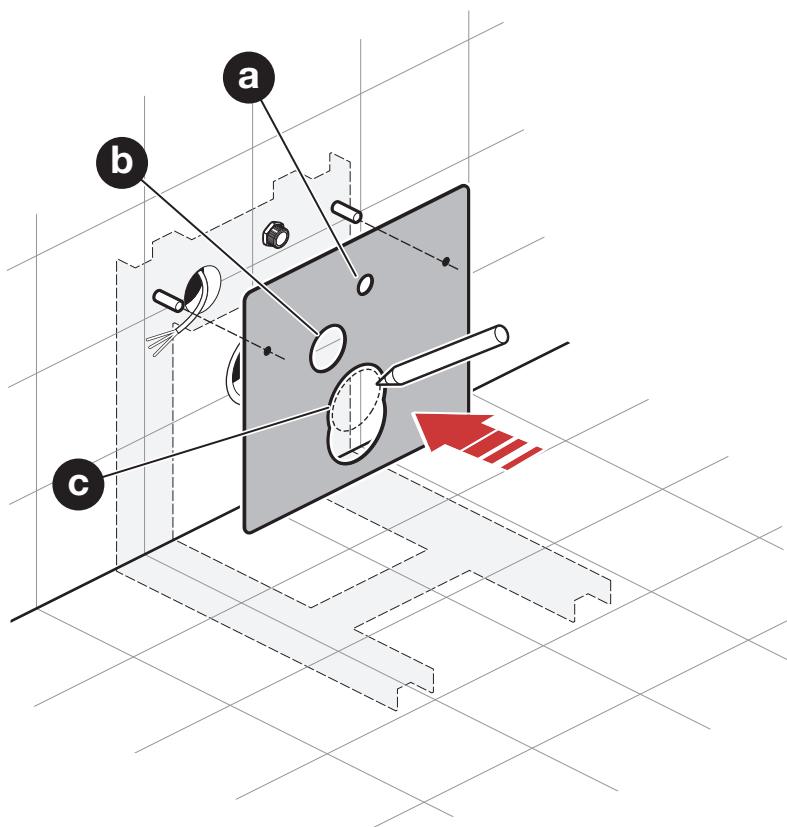

This electric toilet may be installed in zone 2. This recommendation is valid as long as the installation is compatible with the country regulations.

This product (IPX4) shall not be exposed to water jets for cleaning purposes.
